| Write a poem about a woodland animal.<br>Use adjectives to describe how it looks and adverbs to describe how it moves.                                                                                                   | How long is the river Ouse? Can you find out where it begins and which towns it travels through?                                                                                                                                                                                                         | Can you make a 3d habitat for the animal of your choice?<br>Choose a UK animal that might live in a woodland, field, hedgerow or river.                                                                                | Find out about one animal who lives in the British Countryside. Tell me all about him.....<br>.                            |
| Can you find out why Ampthill was a good place for people to settle?<br>What makes a good settlement?                                                                                                                    | Order a selection of leaves and order them by length. Which is the longest? Which is the shortest? Which is the widest?                                                                                                                                                                                  | Can you make a Bug Hotel in your garden? Take a photograph to show the class.                                                                                                                                          | Write some facts about the Willow Tree.                                                                                    |
| Look at an ordinance survey map can you find out what the symbols mean and draw a key explaining.                                                                                                                        | The Age of a Tree<br>Use a tape measure or a piece of string, and measure the distance around the trunk (or girth) about one metre from the ground. Every 2.5cm of girth corresponds to approximately one year's growth. So a tree with a girth of 100cm will be about 40 years old (100 divided by 2.5) | Can you make a collage of life on the riverbank?<br>You might like to think about what is living <u>on</u> , <u>under</u> and <u>around</u> the water.                                                                 | Find out about and identify trees in your local area.                                                                      |
| Write a short story about a woodland animal who has to find a new home as his habitat has been destroyed.                                                                                                                | Can you draw some leaves and make sure that the pattern of their veins are symmetrical.                                                                                                                                                                                                                  | Make a 3d mini beast. You can use any materials that you like.                                                                                                                                                         | Can you find out about and create a life cycle model for the mini-beast of your choice? (Excluding butterflies and frogs). |
