

## Yr2 Learning Log Activity Grid Ice and Fire Spring 2025

<b>ICE</b>			
<b>English/ History</b>	<b>Maths</b>	<b>Art and Design / Design and Technology</b>	<b>Science</b>
Make a non-fiction book about an arctic animal. Use illustrations and headings.	Estimate how many ice cubes can fill different containers in your house and then use ice to find out the answer.	Make a 3D snowman. Remember he will need a hat, scarf and buttons etc.	What is ice? What changes it? Where does ice melt quickest? How can you keep an ice block solid?
Write a story about the Arctic. Use adjectives and similes and remember correct punctuation.	Draw different size snowmen and write down in centimetres how tall each one is.	Draw, paint or make a collage to show a winter scene.	Which animals survive in the Arctic? How?
Samuel Pepys wrote a diary during the Fire of London. Write your own diary of your weekend.	Order the main events of the fire of London on a timeline.	Make 'hot colour' collage. This could be a fire of London scene or 'hot' scene of your choice.	Take some pictures or draw what happens to everyday objects when you heat them. For example chocolate. (Adult help needed)
Find out some facts about the Fire Service in the past and compare it with what you know today.	Draw four different sized ladders. Show you can count in tens, twos, fives and threes on each step of the ladder.	Make a 3D Tudor house.	Design a fire safety leaflet for your house or the school.
